

CIS Department Meeting
April 25, 2017

In attendance: Jeff James, Teresa Roberson, Dawn Marcovia, Haley Robbins, Tommy Stell, and Leonard McCoy.

The main concerns for business and industry as far as security are phishing and viruses.

It is important for students to be aware of protocols, phone switches and telecom technologies. They should also be aware of phone managers.

TNT could possibly utilize interns in Spring and Summer for help on ISeries.

SQL should be incorporated into RPG so that students are familiar with that. Administration should also be stressed on the ISeries.

SharePoint should be taught including how to integrate outlook calendars to SharePoint calendars.

SQL should be incorporated into .net classes and Excel.

Crystal Reports should be taught because it is highly utilized in the real world.

.net is also used in the real world including scripting and the power shell.
