

CIS Department Meeting
April 28, 2015

In attendance: Jeff James, David Clark, Teresa Roberson, Fred Coman, Brian Geans, and Stephen Chandler.

We discussed the changes to the CIS curriculum at the state level. None of the members use Cyber Security so they had no suggestion for that. Fred suggested that we offer Security + and Networking certification. David said that they used CGI for all app development that they do but the only thing they do is to allow Ipads to access their system. He also said that they use net.data and Iboot.

All companies pay for training for IT personnel and suggested that this should be mandatory even in the education field to keep employees up to date.

Brian Geans asked if we offered business/industry training for Windows 10. I told him to let me know when it was needed and I would put him in touch with the right person.
